## **EXAMINER'S AMENDMENT**

 An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Stephen Schlater on 6/9/04.

The application has been amended as follows:

In claim 6, line 6, delete "water" and insert therefor --hydrocarbons--.

2. The following is an examiner's statement of reasons for allowance: Although the prior art such as Hart and Carlin teach fluids which can comprise the compounds within thescope of the present invention, such do not teach the use of the present encapsulated form or, such terpene or sterol comprising a wax. The prior art in general teaches compounds which are sterols or terpenes, used in aqueous compositions, but such are mainly used as surface active agents, and not in their crystalline form. Fischer (3393690) teaches the use of a process similar to that of claim 7, using a borneol compound, however such compound is melt mixed with a polymer, and thus not in crystalline form. Burger (6182759) teaches the use of a homogenous phase composition, which may contain a wax such as lanolin wax, for use as a plugging agent.

Application/Control Number: 09/533,750

Art Unit: 1712

However, such is not taught as being in crystalline form, or with sufficient specificity to render the current claims obvious to one of ordinary skill in the art, since most teachings are directed to organic solvents and organosilicon compounds.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Philip C Tucker whose telephone number is 571-272-1095. The examiner can normally be reached on Monday - Friday, Flexible schedule.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasu Jagannathan can be reached on 571-272-1119. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
